Profile

Senior Frontend Developer with 4.5 years of experience building high-performance web applications using React, Angular, TypeScript, and JavaScript. Currently working as a Consultant at EY, specializing in reusable frontend architecture, performance optimization, and intuitive user experiences. Passionate about building high-quality products and writing clean, maintainable code.

Technical Skills

- **Programming Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS3
- **Frontend:** React, Angular, React Router, React Hook Form
- **State Management:** Redux, NgRx, RxJS
- **UI & Styling:** Tailwind CSS, shadcn/ui, Angular Material, Ant Design
- **Architecture & Design:** Component-Based Architecture, Micro Frontend, MVC/MVVM, Dependency Injection
- **Performance:** Code Splitting, Lazy Loading, Performance Optimization
- **API & Real-Time:** RESTful APIs, WebSocket, Firebase
- **Testing:** Jest, Jasmine, Karma
- **Build & Developer Tools:** Vite, npm, Git, Bitbucket, Postman, JIRA, Figma, Visual Studio Code, ESLint, Prettier
- **Cloud & DevOps:** AWS, Docker, Kubernetes, CI/CD
- **AI & LLM:** OpenAI API, Gemini API, LangChain, GitHub Copilot, Prompt Engineering

Professional Experience

Consultant, *(EY)* **New Delhi, India** *02/2026 - present*

- Owned the end-to-end development of major enterprise frontend modules using **Angular**, **TypeScript**, and **JavaScript**, while contributing to React applications through reusable UI components, custom React Hooks, and shared libraries.
- Enhanced the frontend codebase by implementing reusable components and optimizing application performance through code splitting, lazy loading, dynamic imports, and memoization techniques, improving maintainability and overall user experience.
- Designed and integrated secure authentication, **RBAC**, route guards, and **RESTful APIs** while implementing asynchronous data workflows using **React Query** and **RxJS**, collaborating with cross-functional teams to deliver production-ready applications in Agile environments.

Frontend Developer, *(Ira Technologies)* **Noida, India** *08/2023 - 02/2026*

- Developed an **AI-powered customer support module** using **React, OpenAI API, and HeyGen**, enabling interactive avatars to answer customer queries with real-time business information and improving customer engagement.
- Built and enhanced enterprise web applications using **Angular and React**, implementing features such as **role-based authentication, work order management, and appointment scheduling** to improve operational efficiency and user experience.
- Automated communication workflows through SMS, email, and push notifications, **reducing operational workload by 90%** and improving communication efficiency across the organization.
- Developed an **enterprise data management platform** that enabled users to design, modify, and manage database tables through an intuitive interface, reducing manual effort and improving data management efficiency.

Software Developer, *(Swastik Infotech Services)* **Kolkata, India** *03/2023 - 08/2023*

- Contributed to the development and enhancement of the **Factory Management System** and **Vendor Portal** using **Angular, MVVM architecture, Angular Material, and Kendo UI**, improving application functionality and maintainability.
- Developed business-critical modules including **checklists, checksheets, product quality inspection, and employee management**, following best practices for RESTful API integration and reusable component development.
- Upgraded Angular components, implemented UI enhancements, and ensured compatibility with the latest framework and third-party library versions, improving application stability and user experience.

Software Developer, *(Codestore Technologies Pvt. Ltd.)* **Noida, India** *01/2022 - 12/2022*

- Developed key e-commerce features including guest checkout, cart management, and order review workflows, simplifying the purchasing experience and reducing checkout friction.
- Developed unit test cases for Angular components using **Jasmine** and **Karma**, achieving **80% code coverage** and improving application stability.
- Collaborated using **Git**-based workflows by managing feature branches, resolving merge conflicts, and participating in code integration to support efficient team development.

Projects

PARIVESH – Government of India Environmental Clearance Portal *02/2026 - present*

- Contributed to the development and enhancement of the **PARIVESH** platform by building scalable frontend features, reusable UI components, and shared libraries using **Angular, React, and TypeScript**.
- Modernized the Angular codebase by migrating legacy templates to the latest Angular control flow syntax, improving code readability, maintainability, and alignment with modern Angular best practices.
- Integrated secure RESTful APIs, implemented role-based access control (RBAC), and optimized application performance through lazy loading, code splitting, and reusable frontend architecture.

American Standard Home Services – Enterprise Home Services Platform *01/2025 - 01/2026*

- Developed enterprise modules for work order management, installation workflows, user management, and sales representative and installer onboarding using **Angular** and **TypeScript**.
- Developed customer-facing features including one-time appointment scheduling and online form submissions, reducing manual coordination and improving the overall customer experience.

Data Designer – Enterprise Data Management Platform *08/2024 - 12/2024*

- Developed an enterprise data management platform that enabled users to design and modify database tables, manage relationships and permissions, and create new tables from multiple data sources.
- Built dynamic React interfaces using **React Query**, **Redux**, and **Ant Design**, delivering an intuitive experience for complex data management workflows and reducing manual effort.

Butterfly Configurator – Workflow Automation Platform *02/2024 - 08/2024*

- Developed a configurable workflow automation platform that enabled users to define data sources, apply custom filters, and create rule-based workflows to automate SMS, email, and push notifications.
- Developed configurable React-based workflows using **Redux**, **Ant Design**, and **AWS Cognito**, enabling secure authentication and an intuitive experience for configuring complex business workflows.

Education

B.Tech in Computer Science (80%) *Roorkee Institue of Technology* **Roorkee, India**

12th Boards(State) (84.6%) *Govt. Model H.S.S Waidhan* **Singrauli, India**

10th Boards(State) (73.4%)) *Govt. Model H.S.S Waidhan* **Singrauli, India**
