Profile

Skilled Frontend Developer with 3.5 years of hands-on experience and a Bachelor's degree in Computer Science, currently working at Ira Technologies. Proficient in building responsive and scalable web applications using modern frameworks like Angular and React. Experienced across full-time roles, freelancing, internships, and personal projects, with a strong focus on performance, usability, and clean code.

Areas of Expertise

Frontend Development – Angular – React.js – JavaScript – TypeScript – Redux – RxJS – NgRx – Angular Material – Material UI – Ant Design – Firebase – WebSocket – jQuery – AJAX – Karma – Jasmine – Jest - Unit Testing – Figma – Visual Studio Code – Agile Methodologies – JIRA – GIT

Professional Experience

Frontend Developer, *(Ira Technologies)* **Noida, India** *08/2023 - present*

- Automated communication processes (SMS, email, and push notifications), **reducing operational team workload by 90%** and significantly improving efficiency across the organization.
- Spearheaded the development of an **advanced data management platform**, empowering users to effortlessly design, modify, and manage database tables, **reducing manual intervention**, and improving data handling efficiency.
- Utilized advanced technologies like **Redux, React Query, Firebase, Angular Material, RxJS, NgRx, and WebSockets** for a seamless user experience.
- Designed the application architecture with **Component-Based/MVVM/MVC principles using various Design Patterns** and implemented **Dependency Injection** for scalability and maintainability, resulting in significant improvements in application performance and user engagement.

Software Developer, *(Swastik Infotech Services)* **Kolkata, India** *01/2023 - 08/2023*

- Played a pivotal role in maintaining and enhancing the Factory Management System and Vendor Portal as a Software Developer, utilizing **MVVM architecture, Angular, Kendo UI, Angular material**.
- Implemented the **checklist, checksheet, product quality check, and employee management features** in the Factory Management System. Utilized **best practices for API integration and reusable components** ensuring reliable and efficient functionality.
- Responsible for upgrading **Angular components, implementing UI enhancements**, and ensuring compatibility with the latest **library** versions.
- Successfully contributed to **improving application functionality and user experience**, ensuring alignment with evolving **Angular standards and best practices**. Actively participated in **code reviews and discussions** to enhance **code quality and maintainability**.

Software Developer, *(Codestore Technologies Pvt. Ltd.)* **Noida, India** *01/2022 - 12/2022*

- Streamlined the shopping experience by allowing users to add **items to their cart, review selections, and complete the checkout process without account login**, significantly **reducing friction** and **boosting user engagement and conversion rates**.
- Engineered automated **unit test suites with Jasmine and Karma, achieving 80% code coverage** to enhance application stability, catch edge cases early, and ensure consistently **high performance in production**.
- Utilized **Git for version control and team management**, ensuring efficient collaboration and code management. **Managed code branches, merged changes**, and **resolved conflicts** to keep the project organized.

Software Developer Intern, *(Exam Lounge)* **Pune, India** *07/2021 - 09/2021*

- Developed a REST API using Spring Boot to **generate leaderboard data in Excel format**, allowing students to view their rankings after completing assessments.
- Implemented a **feature to send personalized emails** to students with their test results, **enhancing communication and user engagement.**

Projects

Data Designer *08/2024 - present*

- A data management platform enables users to **modify table structures, manage relationships and permissions**, and **create new tables from multiple sources** with an intuitive UI.
- Built on **React codebase**, utilizing **Redux, Ant Design, React Query, Axios**.

Butterfly Configurator *02/2024 - 08/2024*

- A tool enables users to select data sources, apply customizable filters, and establish rules to **automate communication actions** (SMS, email, or push notifications) based on specific conditions.
- Built on **React codebase with component-based architecture**, utilizing **Ant Design (Antd)** for UI development, **Axios** as the HTTP client for networking, **Redux** for state management, and **AWS Cognito** for authentication.

Tizo - E-commerce Platform *08/2023 - 11/2023*

- E-commerce platform for **online shopping in Nicaragua**, facilitating user-friendly **product viewing and purchasing**, as well as **seller product listings**.
- Built on **Angular codebase with MVVM architecture**, utilizing **Angular Material, Tailwind CSS** for UI development, **Angular google map** for locating the address, and **WebSockets and FFmpeg** for live streaming.

Skills

- **Languages:** JavaScript, TypeScript
- **Frontend Development:** Angular, React
- **Tools:** AWS, Docker, Kubernetes, Firebase, Postman, Git, Bitbucket, Visual Studio Code, IntelliJ IDEA
- **Architecture Patterns:** MVC, MVVM, Micro Frontend
- **Testing:** Jasmine, Karma, Jest
- **CI/CD:** Continuous Integration and Continuous Deployment pipelines, JIRA

Education

B.Tech in Computer Science (80%) *Roorkee Institue of Technology* **Roorkee, India**
12th Boards(State) (84.6%) *Govt. Model H.S.S Waidhan* **Singrauli, India**
